The 2nd Maghreb Conference on
Desalination and Water Treatment
"CMTDE 2009"

19-22 December 2009

Sol Azur Beach Congress Hotel****
Hammamet, Tunisia

CONFERENCE OBJECTIVE

The second Maghreb Conference on Desalination and Water Treatment provides an excellent forum for professionals, scientists and technologists from North Africa countries. It will be devoted to fresh water for the Maghreb where the situation is dramatically more serious with rapidly increasing population and much lower rainfall. The following objectives will be discussed:

- Research and applied work in desalination and water treatment,
- Present state of the art of desalination and water purification,
- Needs for Maghreb countries in research, formation and cooperation.

CONFERENCE TOPICS

- Desalination in remote and arid areas,
- Wastewater treatment and reuse,
- Reverse osmosis,
- Electrodialysis,
- Ultrafiltration, Nanofiltration,
- Membrane distillation,
- Thermal desalination processes,
- Membrane preparation and characterization,
- Pretreatment (fouling and scaling, removal of specific compounds), membrane processes,
- Post-treatment of desalinated waters (calco-carbonic equilibrium, corrosion, ...)
- Chemistry and thermodynamic of saline waters,
- Economic aspects of desalination, renewable energy, nuclear energy, energy recovery,
- Desalination and the environment.

SCIENTIFIC PROGRAM

The conference program will consist of:

- Plenary lectures,
- Oral presentations and poster sessions,
- Industrial exhibitions,
- Round table.

Conference Language

The official language of the Conference is English, without simultaneous translation.
